

3D Print Log

Record the settings that produced each print, so a good result can be repeated and a failed one diagnosed instead of guessed at.

Every print, with the settings that produced it — so a good result can be repeated and a bad one diagnosed.

YOUR SETTINGS ARE THE POINT OF THE LOG

No temperatures, speeds or profiles are printed on this sheet. They depend on your printer, your filament and the room it is standing in, and copying a stranger's numbers is exactly the habit this log exists to replace.

PRINTS

Date	Model or part	Filament and colour	Nozzle temp	Bed temp	Layer	Speed	Infill	Supports	Time	Result
			yours	yours						

MAINTENANCE

- ☐ Nozzle changed or cleaned
- ☐ Bed levelled or mesh re-run
- ☐ Belts checked
- ☐ Lead screws and rods lubricated
- ☐ Fans clear
- ☐ Extruder gear cleaned
- ☐ Firmware updated
- ☐ Filament dried or resealed
