

Aviary and Cage Bird Record

Keep a register of the birds and a record of the round, with the ring numbers that matter for breeding and for any licensing.

Ring numbers, breeding, moult and the cleaning round for an aviary or a cage.

LICENSING AND RINGING RULES DIFFER BY SPECIES

Some species require licences, registration or ringing, and what applies differs by country and by species — including for birds bred in captivity. Check before acquiring or selling. No diets or temperatures are printed.
