

Barn and Housing Cleaning Record

Record cleaning and disinfection properly, with the contact time and rest period that decide whether it achieved anything.

Mucking out, disinfection and the rest between batches, dated and signed.

DILUTION AND CONTACT TIME COME FROM THE LABEL

No cleaning interval and no product is recommended. Disinfectants must be used at their own dilution and contact time, and for notifiable disease your authority specifies which may be used. Write yours down and record against it.

Holding			Building		Stock housed		Year
