

Bicycle Service and Maintenance Log

Track servicing against distance and record chain wear, which is what decides whether a cheap chain change becomes an expensive cassette.

Servicing by distance rather than by date, with the component life that decides when a chain becomes an expensive cassette.

YOUR FIGURES IN THE REFERENCE BLOCK

No service intervals or wear limits are printed here. They depend on the bike, the conditions and the rider, and your manufacturer's figures are the ones to use. Write them in the reference block so they are on the sheet where the work is recorded.
