

Breeding and Bloodline Record

Hold a pedigree on paper so breeding decisions and registrations can be made without reconstructing three years of matings from memory.

Sire, dam and offspring across generations, so a breeding decision can be made without guesswork.

IT RECORDS THE PEDIGREE, IT DOES NOT ADVISE ON IT

No inbreeding coefficients, mating recommendations or genetic advice are given here. This records the pedigree you know. Where breeding decisions carry real risk, a breed society or a geneticist is the source, not a printable.
