

Calibration Record

Keep track of the instruments you rely on and when each was last checked, so you know which numbers you can trust.

Which instruments you rely on, when each was last checked, against what, and by whom.

INTERVALS COME FROM THE INSTRUMENT, NOT FROM US

No calibration intervals or tolerances are printed. They come from the instrument's manufacturer, from what you are using it for, and from any standard you work to. An instrument nobody has checked is a confident source of wrong numbers. What must be tested or recorded, how often, by whom and how long the record must be kept differ by country and by the kind of premises. This sheet prints no interval and no criterion, names no scheme and satisfies no regulation on its own.
