

Calving and Lambing Record

Record each birth while the detail is still exact, including the assistance and the losses, so next season is planned from what happened rather than what you recall.

What happened at each birth, written the same day — dam, assistance, offspring and outcome.

A RECORD OF THE BIRTH, NOT GUIDANCE ON IT

This sheet records births. It gives no guidance on when to intervene, when to call a vet or what is normal, because those are judgements for you and your vet on the day and in front of the animal.

HOW TO USE THIS SHEET

- 1 Fill it in on the day. Assistance and timings are the details that vanish first and matter most next season.
- 2 Record the outcome honestly, including losses — a season read back with the losses left out teaches you nothing.
- 3 Note anything you would do differently with this dam next time.
