

Candle and Soap Batch Record

Make a batch traceable, so a good one can be repeated and a bad one can be traced back to what went into it.

A batch record for candles, soap and melts — what went in, in what quantity, and how it performed.

YOUR RECIPE AND YOUR SUPPLIER'S DATA

No fragrance load, cure time, temperature or recipe is printed on this sheet. Those come from your supplier's technical data and from the safety rules that apply where you sell, and getting them from a printable would be a bad idea. This records what you did so you can repeat it.

Batch number

Date made

Made by

Product

WHAT WENT IN

Ingredient or component	Supplier	Lot or batch no.	Quantity	Percentage

HOW IT WAS MADE

Vessel or mould

Wick or additive
