

# Cattle Herd Record

Hold the herd's detail in one legible place, so tags, parentage and movements can be read off a page instead of assembled from memory and text messages.

The herd on paper — ear tag, breeding, calvings and movements, one animal per line.

**THIS IS NOT AN OFFICIAL HERD REGISTER**

Most countries require cattle keepers to hold a herd register, and many specify its form, its content and how long it must be kept. This is a working record, not that register. Check what your own authority requires and keep this alongside it, not instead of it.
