

Coop Cleaning and Bedding Record

Keep the cleaning round on a dated record, with the red mite check that is easy to skip and expensive to skip twice.

The cleaning round for a coop or house — spot clean, full muck-out, bedding changed, disinfectant used.

YOUR INTERVAL, THE PRODUCT'S LABEL

No cleaning frequency and no product is recommended. How often a house needs doing depends on the birds, the stocking and the weather, and any disinfectant must be used to its own label. Write your interval at the top and work to it.
