

Craft Project Log

Record the things a finished object cannot tell you later: which dye lot, which hook you really used, and how much was left over.

One project at a time — the pattern, the yarn or thread, the hook or needle, and how it actually went.

WRITE DOWN WHAT THE PATTERN DOES NOT TELL YOU

The details that matter are the ones you cannot recover later: which dye lot, which hook size you actually used rather than the one the pattern said, and how much yarn was left over.
