

Daily Vehicle Check and Driver Log

Record the check before driving and the journeys after it on one sheet per day.

The walk-round check before driving and the journeys made after it, on one sheet per day.

CHECK FIRST, THEN DRIVE

Two records that belong together: what you found when you looked at the vehicle, and where it then went. What a driver is legally required to check and record depends on the vehicle and the country — the check items are blank for you to write in your own.
