

Dairy Milk Yield Record

Record yields per animal daily, with the notes that turn an unexplained drop into an early warning.

Daily yield per animal across the herd, with the feed and health notes that explain a drop.

THE NOTES COLUMN IS THE POINT
A yield drop is usually the first sign of something else. The notes column is what turns this from a number into a warning. No expected yields, cell counts or thresholds are printed.

Herd		Month			Recorded by		Units
Animal	Date	AM	PM	Total	Cell count, if taken	Feed	Health notes
