

Equine Dental Record

Keep a dental history so that changes in a horse's mouth are tracked rather than rediscovered every couple of years.

Dental visits, what was found and what was done — with the date the practitioner wants to see the horse again.

WHO MAY DO WHAT DIFFERS BY COUNTRY

Who may perform equine dentistry, and what procedures require a vet, differ by country and are regulated in many. No interval is printed: it depends on the horse's age, teeth and work. Record who did it and what qualification they hold.

Horse		Age	Owner	Practitioner and qualification		
Date	Examined by	Findings	Work done	Sedation	Cost	Next due

Eating, quidding or biting problems noticed since
