

Feed Ration and Cost Record

Record what each group is fed and what feed actually costs across a year, which is usually the largest bill on a smallholding.

What each group is fed, what it costs, and what the year's feed bill actually came to.

YOUR RATION, YOUR MERCHANT'S FIGURES

No rations, quantities or feeding rates are printed here. They depend on species, stage, condition, forage quality and what you are producing, and they come from your feed merchant, your vet or a nutritionist. This records what you decided and what it cost.
