

Feeder Insect and Livefood Record

Keep track of livefood stock and cultures so a feeding day does not arrive with an empty tub.

Cultures, gut loading and stock, so the live food does not run out on a feeding day.

WHAT TO DUST WITH IS YOUR VET'S CALL

Gut loading and dusting matter as much as the insect itself, and what to use differs by the animal being fed. No products, schedules or ratios are printed. This tracks your own stock and routine.
