

Fish Stock and Livestock Record

Keep a record of what went into the tank and when, with the adult size that should have been checked before buying.

What is in the tank, when it went in, where it came from and what became of it.

RESEARCH ADULT SIZE BEFORE YOU BUY

No stocking levels or compatibility guidance are printed. What a tank can hold depends on filtration, maintenance, species and adult size — and adult size is the figure most often missed at the point of purchase. Research the species before it goes in the bag.

Tank			Volume		Set up on		Type	
Species	Number	Added on	Source	Cost	Adult size expected	Quarantined	Lost or moved on	Notes

Losses and what you think caused them
