

Freeze Drying Batch Log

Build your own run-time and yield figures, which after twenty batches beat anybody else's.

One line per batch — what went in, how it was prepared, how long it ran, and how it came out.

YOUR MACHINE, YOUR NUMBERS

Run times, tray loads and pre-treatment are specific to your machine, your altitude and what you are drying, so none are printed here. The value of the log is that after twenty batches your own figures are better than anybody else's.
