

See what a vehicle actually costs to run and spot a change in fuel consumption early, which is often the first sign that something mechanical is wrong.

DECLARE YOUR UNITS, THEN KEEP TO THEM

No units are printed anywhere on this sheet, and no consumption figures either. Write at the top which units the odometer reads in, which you buy fuel in, and how you want consumption expressed — then keep to them, because a column of numbers in mixed units records nothing. Fill to the same point every time and read the odometer at the pump: brim to brim is what makes one line comparable with the next.

FILLS one line per fill, in order, with no gaps

[illegible]
