

Goose and Waterfowl Care Record

Record the daily round for ducks and geese, whose water needs and predator risk are both different from chickens.

Daily care for geese and ducks — water, feed, lay and the shutting-up that decides whether they are there in the morning.

A RECORD OF THE ROUND, NOT A SPECIFICATION

Waterfowl need bathing water rather than just drinking water, and how much depends on the birds and your setup. No figures are printed. What this sheet does is make sure the round happened and got written down.

Holding		Flock			Number of birds		Month
Date	Count	Water changed	Fed	Eggs	Shut in	Health or behaviour notes	By
