

Grazing Rotation and Field Record

Track field rest and poo-picking, the two things that do most for horse grazing and that nobody records.

Which field, rested how long, poo-picked when, and topped or harrowed by whom.

YOUR GROUND, YOUR ADVISER'S FIGURES

No rest periods or stocking rates are printed. Horse grazing management depends on your ground, your worm burden and how much land you have, and your vet or an adviser is the source. This records what you did.

Yard or land				Year	Fields		Recorded by	
Field	Horses on	On	Off	Days grazed	Rested since	Poo-picked	Topped or harrowed	Condition
