

Guinea Pig Care and Health Record

Track the four things guinea pigs most often go wrong on, with a weight column that catches trouble early.

Weight, vitamin C, nails, teeth and companionship — the four things guinea pigs go wrong on.

WHY THOSE COLUMNS EXIST — BUT NOT THE QUANTITIES

No diet quantities or supplement doses are printed. Guinea pigs cannot make their own vitamin C and their teeth grow continuously, which is why those columns exist — but how much of what, and how often, is a matter for your vet and a species-specific source.
