

Hamster and Small Rodent Care Record

Keep a weekly record for animals whose decline is easy to miss and quick once it starts.

Feeding, cleaning, weight and wheel — the weekly round for a hamster, gerbil, mouse or rat.

SPECIES THAT LOOK SIMILAR ARE NOT INTERCHANGEABLE

No diet, cage size or temperature is printed. Requirements differ sharply between species that look similar — a Syrian and a dwarf hamster are not interchangeable, and rats are social where hamsters usually are not. Get species-specific guidance and record against it.

Species		Name			Acquired		Cage and size	
Date	Weight	Eating	Drinking	Wheel or activity	Spot clean	Full clean	Teeth and nails	Notes
