

Hoof Trimming and Foot Care Record

Record foot problems by animal so that the repeat offenders become obvious, which is the single most useful thing a lameness record does.

Who was trimmed, what was found, and who needs looking at again.

RECORD WHAT YOU FOUND; THE DIAGNOSIS IS YOUR VET'S

Lameness is recorded here, not diagnosed. What a particular lesion is, and how it should be treated, is for your vet or foot trimmer. No trimming interval is printed — it depends on ground, breed and the individual animal.
