

Horse Feed and Supplement Chart

Put the feeding instructions where the feeding happens, written so that somebody who has never done it can do it correctly.

What each horse gets, morning and evening, written for whoever is feeding — including the person who has never done it before.

WRITTEN FOR WHOEVER IS FEEDING TONIGHT

This chart is for the feed room wall. Write it so a stranger could feed correctly: name the scoop, name the product, say how much. No quantities are printed here because they depend on the horse, the work and the forage — your vet or a nutritionist sets them.
