

Kitchen Cleaning Rota

Set out who cleans what and how often, with initials against each day so the rota is a record rather than an intention.

Who cleans what, how often, and the initials that say it was actually done.

NO PRODUCTS OR DILUTIONS ARE PRINTED
No product, dilution or contact time is printed here. Those come from the manufacturer's instructions for the product you actually use, and using them wrongly is worse than not using them at all. Write your own method against each task.
