

Lifting Equipment Inspection Register

Keep track of what lifting gear you hold, what each item is marked at, and when each was last examined.

Slings, chains, shackles, eyebolts and hoists — what you have, its marked capacity, and when it was last examined.

CAPACITIES COME OFF THE ITEM, NOT OFF THIS SHEET

The working load limit goes in from the marking on the item itself. Nothing is printed here, because a capacity taken from a printable rather than from the equipment is how people get hurt. Examination intervals and who may carry them out differ by country. Who may authorise and carry out this work, what training and certification they need, what must be recorded and how long it must be kept differ by country and by workplace. This sheet names no scheme, sets no criteria and satisfies no regulation on its own — check what applies where you are.
