

Pig Housing and Pen Cleaning Record

Record the all-in all-out cycle, including the rest period, which is the part that actually breaks a disease cycle.

The pen cleaning round, with the batch rest that breaks a disease cycle.

THE REST PERIOD IS YOUR VET'S FIGURE
All-in, all-out and a proper rest between batches does more for pig health than most things bought in a bottle. How long to rest a pen depends on what you are breaking; your vet is the source.

Holding			Building or pens		Rest period you use		Year
Date	Pen	Batch out	Mucked and washed	Disinfectant used	Dry and rested until	Batch in	By
