

Plant and Forklift Pre-Use Inspection

Keep a week of daily walk-around checks on a single sheet that lives with the machine, so the record is made where the machine is rather than in an office.

A week of daily pre-use checks for a forklift, telehandler or similar machine, on one sheet that lives with the machine.

THE CRITERIA ARE YOURS, NOT OURS
No pass or fail criteria are printed here, and no inspection interval. Who may operate a machine, what training they need and how often it must be examined differ by country and by workplace. Check what applies, and record the result here.
