

Scaffold Inspection Record

Keep a dated inspection history for one scaffold, with findings and the action taken recorded beside each inspection.

A dated record of scaffold inspections — who inspected, what they found, and what was done about it.

NO INTERVALS OR LIMITS ARE PRINTED

No inspection interval, load class or tie spacing is printed here. Those come from the design, the erecting contractor and local rules, and a generic figure would be wrong and dangerous. Record what applies to this scaffold in the header. Who may authorise and carry out this work, what training and certification they need, what must be recorded and how long it must be kept differ by country and by workplace. This sheet names no scheme, sets no criteria and satisfies no regulation on its own — check what applies where you are.
