

Sheep Worming and Treatment Record

Record treatments with the wormer class written down, which is what makes any resistance plan possible a year later.

Group by group, what was given and when the withdrawal ends — with the wormer group written down.

RECORD THE GROUP; THE PLAN IS YOUR VET'S

No product, dose, interval or wormer group rotation is printed here. Resistance management differs by region and by what your own faecal egg counts show; your vet or adviser is the source. Recording the group you used is what makes any rotation plan possible later.
