

Snake Feeding and Shedding Record

Track feeding and shedding together with weight, so a refusal can be read against temperature and the shed cycle instead of worried about blindly.

Feeds taken and refused, sheds complete or in pieces, and the weight trend that ties them together.

YOUR REGIME, FROM A SPECIES SOURCE

No feeding frequency, prey size or shedding interval is printed. They depend on species, age, size and temperature, and a wrong figure causes real harm in either direction. Write your own regime at the top, from a species-specific source, and record against it.

Species

Name or ID

Hatched or acquired

Feeding regime you follow

FEEDING

Date	Offered	Size	Taken	Refused	Weight	Enclosure temp	Notes

SHEDS

Went blue	Shed on	Complete	Eyes and tail clear	Humidity at the time	Action taken
