

Tack Inspection and Fitting Record

Record tack checks so that worn stitching is found in the tack room rather than discovered at a canter.

Stitching, billets, trees and saddle fit — checked and dated, because tack fails at the worst possible moment.

FIT IS A FITTER'S JOB; CHECKING IS YOURS

No inspection interval is printed and no fitting advice is given. Saddle fit changes as a horse changes shape and should be checked by a qualified fitter; stitching and billets are checked by whoever rides. Record what was found.
