

Tally and Count Sheet

Count things by hand while doing something else, with the categories named and the totals worked out at the end of each row.

Counting things by hand: a row per category, a wide space for tally marks, and a total at the end.

TOTAL EACH ROW BEFORE YOU PUT THE PEN DOWN
Tally marks are still the fastest way to count things while doing something else — stock, birds, cars, votes, customers, sheep through a gate. Total each row when you stop, not later.
