

Temporary Works Register

Give every piece of propping, shoring, falsework or edge protection an owner and four dated signatures, so nothing is loaded or struck on an assumption.

A register of everything temporary that something else is relying on — propping, shoring, falsework, edge protection.

EVERY ITEM HAS AN OWNER AND FOUR SIGNATURES

Temporary works fail when nobody owns them. This register records who designed each item, who checked the design, who signed it off for loading and who signed it off for removal. It sets no design standard and prints no loads. Who may authorise and carry out this work, what training and certification they need, what must be recorded and how long it must be kept differ by country and by workplace. This sheet names no scheme, sets no criteria and satisfies no regulation on its own — check what applies where you are.

Project			Temporary works coordinator			Register started
