

Towing Weights and Limits Record

Get your own towing figures out of four different documents and onto one sheet, with a line for every time the outfit is actually weighed.

A fill-in-once record of the weights and limits that apply to your own vehicle, trailer and licence, so the numbers are written down instead of half-remembered on a weighbridge.

EVERY FIGURE HERE IS YOURS, NOT OURS

Nothing on this sheet sets a limit. Towing limits come from your vehicle manufacturer and the plates on the vehicle and trailer; what you are entitled to tow comes from your licence, and licence categories differ by country and by when you passed your test. Copy every figure from your own registration document, the plates themselves, and the licensing authority where you live — and check it again if any of those change.

TOWING VEHICLE

Make & model		Registration		Year
Kerbweight / mass in service		Gross vehicle weight		Source of figures
Max braked trailer	Max unbraked	Max train weight	Max noseweight	

TRAILER

Make & model		Chassis / ID no.		Year
Plated MAM	Unladen weight	Axles	Braked?	Coupling rating
Max axle load	Tyre size & load index	Noseweight limit		

LICENCE AND ENTITLEMENT check this against your own authority, and date it

Driver	Licence categories held	Date test passed
Entitlement confirmed on	Checked against — authority or document	

WEIGHED, LOADED AND CHECKED
