

# Tupping and Scanning Record

Record which ram covered which group and when, so scanning results and lambing dates can be worked out rather than guessed.

Rams in and out, raddle changes, scanning results and the dates they imply.

**WORK YOUR OWN DATES AND WRITE THEM IN**

No gestation figure and no expected lambing date is printed. Work them out for your own breed and write them in — a printed date would be wrong for somebody, and lambing is not a thing to be wrong about.

**TUPPING**

| Group | Ram | Raddle colour | In on | Out on | Ewes marked | Notes |
|-------|-----|---------------|-------|--------|-------------|-------|
|       |     |               |       |        |             |       |
|       |     |               |       |        |             |       |
|       |     |               |       |        |             |       |
|       |     |               |       |        |             |       |
|       |     |               |       |        |             |       |
|       |     |               |       |        |             |       |
