

Vegetable Garden Planner

Plan the season with last year's beds in front of you, which is the only way rotation decisions get made from fact rather than memory.

Bed by bed for the whole season, with what grew there last year in front of you while you decide.

LAST YEAR'S BEDS BESIDE THIS YEAR'S PLAN

No rotation rules, spacings or sowing dates are printed here. They depend on your climate, your soil and what you actually want to eat. The sheet's job is to put last year's beds and this year's plan on the same page.
