

Vehicle Service Record

Keep a service history in your own hands, so it survives changing garages and is there when you sell.

A complete service history for a car or van, kept independently of any garage's system. A documented history is worth real money at resale and is the first thing a buyer asks for.

MILEAGE EVERY TIME

Record the odometer reading every time, and keep the invoices. A service history is a chain of dated mileage readings — a gap in the chain is what makes a buyer nervous.
