

Watering and Irrigation Schedule

Set out what waters what, how, and how often, then keep a dated record through the season alongside the system checks that stop a blocked emitter going unnoticed.

A zone-by-zone watering plan with a month grid to date as you go, and space for the system checks that stop a dry bed being discovered too late.

YOUR FIGURES, NOT OURS

No frequencies and no volumes are printed here. How much water a bed needs depends on your climate, soil, planting and season, and any figure we printed would be wrong somewhere. Write down what you have decided and where that came from.

ZONES

Zone or bed	Planted with	Method	Frequency	Duration or volume	Time of day	Emitters or heads
		hand, drip, sprinkler	you decide			

THROUGH THE YEAR date each square as the zone is watered or checked

Zone	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

SYSTEM CHECKS

- ☐ Filters cleaned
- ☐ Emitters and heads clear and delivering
- ☐ Timer working and battery replaced
- ☐ Leaks and splits along the run
- ☐ Pressure at the far end of the run
- ☐ Rain sensor or gauge checked
- ☐ Drained before frost
- ☐ Butt or tank clean and covered

Notes and anything specific to yours
